Hi!

I'm not sure wether this is a bug in the newest patchset (062.3) or in my kernel config.

But when i try to compile the whole kernel i get:

```
CC [M] drivers/scsi/scsi_dh_export.o
drivers/scsi/scsi_dh_export.c:26: error: redefinition of 'store_scsi_dh_data'
include/scsi/scsi_dh.h:78: error: previous definition of 'store_scsi_dh_data' was here
drivers/scsi/scsi_dh_export.c:34: error: redefinition of 'retrieve_scsi_dh_data'
include/scsi/scsi_dh.h:81: error: previous definition of 'retrieve_scsi_dh_data' was here
make[3]: *** [drivers/scsi/scsi_dh_export.o] Error 1
make[2]: *** [drivers/scsi] Error 2
make[1]: *** [drivers] Error 2
```

Were you able to build it with the stock config?
