Hi,
Am I correct in thinking that SELinux must be disabled in both the Host Node and all Containers?

Assuming this is the case, are there any plans to allow SELinux to be enabled in the HN and VPS Containers in the near future?

Thanks,

---

Hi,
Pity about the lack of SELinux support.

Does anyone know if there any plans to allow SELinux to be enabled in the HN and/or VPS Containers in the near future?

Thanks,

---
