Hello,

Lately I got this problem sometimes.

vzlist shows:

```
5380      1 running 10.10.10.10  t2server
```

1 proccess only?

ok I try to reboot:

```
vzctl restart 5380
```

Restarting VE

Stopping VE ...

Unable to stop VE: operation timed out

```
[root@server ~]#
```

I enter this vps and shutdown it without problem:

entered into VE 5380

```
t2server:/#
```

```
t2server:/#
```

```
t2server:/# ps aux
```

USER	PID	%CPU	%MEM	VSZ	RSS	TTY	STAT	START	TIME	COMMAND
root	1	0.0	0.0	1952	664	?	Ss	Jun05	0:00	init [6]
root	7916	0.0	0.0	1768	404	?	Ss	10:41	0:00	vzctl: pts/0
root	7917	0.0	0.1	2728	1524	pts/0	Ss	10:41	0:00	-bash
root	7921	0.0	0.0	2220	892	pts/0	R+	10:41	0:00	ps aux

```
t2server:/# shutdown -h now
```

```
t2server:/#
```

```
t2server:/#
```

```
t2server:/#
```

```
t2server:/# dgot signal 9
```

```
        exited from VE 5380
```

What might be the issue?

I started this vps without problem later.

Kernel

```
[root@server ~]# uname -r  
2.6.18-92.1.18.el5.028stab060.8PAE  
[root@server ~]#
```

ps. I have changed IP for security reasons.
