Hello!

I have tried to follow wiki:
http://wiki.openvz.org/Traffic_accounting_through_proc

It is nice article but I don't now how to set rddtool creation command. What are the best values?

Place your preferred RRD Creation command here

I really do appreciate your help in this!

Hi.

i think it makes sense to check rrdtool site and check how to use it.

http://oss.oetiker.ch/rrdtool/

Hello,

Yes I know. I hope it would be a faster way to ask here then dig in this documentation there
Maybe someone has already setup this. Also I cannot find out if it possible to summarize traffic
using rrdtool.

i see.
Well, surely it might be faster, just try your way if you want.

i didn't use rrdtool so i'll have to wait for somebody else to help you. Or just read the docs.
