Subject: Transaction check error?
Posted by wyndryder on Mon, 26 Jun 2006 20:05:43 GMT

I've read many posts and cannot seem to decipher what this means and how to fix it. Please help, thanks. This is pertaining to the fedora core 5 cache creation:

Transaction Summary
 ===
================
Install   197 Package(s)
Update   0 Package(s)
Remove   0 Package(s)
Total download size: 146 M
Downloading Packages:
Running Transaction Test
Finished Transaction Test

Transaction Check Error: file /etc/named.conf conflicts between attempted installs of caching-na
        meserver-7.3-5.FC5 and bind-9.3.2-20.FC5
ERROR: yum failed with 1 exit code

can you simply download these RPMs and check which files do they ship? it looks like there is some bug in FC5 and /etc/named.conf is shipped in both?

Well the main node is running fedora 5 w/o yum. Do you think this has something to do with it?

You have to edit the file

/vz/template/fedora-core/5/i386/config/default.list
and change the line saying
caching-nameserver
to
bind-config

This is some strange issue with FC5.
