Subject: Migration of changed VE
Posted by f2zubac on Wed, 08 Jul 2009 14:58:37 GMT

Hello

I'm interesting in setup up 'high redudancy' server cluster.
For example,there are servers A and B.
At the beginning,the VE is started at A and it's mirror is
located at B,waiting for A to corrupt and take its role.
In the meantime,we change something in VE at A,and after that
we'd like to make the exact the same copy of VE at B so the
'images' will be in consistent state in the case of failure at A.

Any ideas or so ?

Sincerely

Dragan Zubac
