Hello,

We want to install FreeBSD from HyperVM control panel. So we need good templates for FreeBSD. So can anyone tell us from where we can get templates for FreeBSD. We are willing to pay for it. But the Freebsd templates should be good.

waiting for the reply.

sachin

It's impossible to run FreeBSD template. OpenVZ allows you to run only different Linux distributions.

Hi,

sorry it's not a place to ask questions about Xen.  
You may have this question be answered here but I'd recommend you ask such questions somewhere else.
