Hi,

I've setup a couple of VM's with venet - and now realise I need veth. How can I change this?

Is it as simple as deleting the IP address from the VM's conf file and then following these instructions?

http://wiki.openvz.org/Veth#Simple_configuration_with_virtual_Ethernet_device

TIA

Huw

Thanks for the reply. Looks like just what I need

Cheers

Huw
