I am having problems to configure a stateful ip6tables on OpenVZ.

```
# ip6tables -A OUTPUT -m state --state RELATED,ESTABLISHED -j ACCEPT
```

```
ip6tables v1.2.11: Couldn't load match `state':/lib64/iptables/libip6t_state.so: cannot open shared object file: No such file or directory
```

Try `ip6tables -h' or 'ip6tables --help' for more information.

```
# ip6tables -A INPUT -m state --state RELATED,ESTABLISHED -j ACCEPT
```

```
ip6tables v1.2.11: Couldn't load match `state':/lib64/iptables/libip6t_state.so: cannot open shared object file: No such file or directory
```

Try `ip6tables -h' or 'ip6tables --help' for more information.

Are you that this is an OpenVZ specific problem?

Quote:

```
/lib64/iptables/libip6t_state.so No such file or directory
```

Do you have such file on a system?
