Guys,
When I tried to migrate the virtuoZZO to openvz using the rsync method, when my first attempt it migrate in the virtuoZZO not in the openvz, so I think the problem is I must point it in the right path. When in my second attempt this is the error that shows.

```
rsync -a -e ssh /vz/root/158 root@ip address of my openvz:/vz/private/

Hello,
I already migrate the one of the container of the virtuoZZO in openvz but the problem is the config file of the container was not copied.
Kindly reply on this. Thank you
