Guys,
When I tried to migrate the virtuozzo to openvz using the rsync method,when my first attempt it migrate in the virtuozzo not in the openvz,so I think the problem is I must point it in the right path. When in my second attempt this is the error that shows.

rsync -a -e ssh /vz/root/158 root@Ip address of my openvz:/vz/private/

Hello,
I already migrate the one of the container of the virtuozzo in openvz but the problem is the config file of the container was not coppied.
Kindly reply on this.Thank you
