Hi. Is there a patch for stable (e.g. from 2.6.30) Ext4 compatible with OpenVZ 2.6.27 from GIT?

Why do you expect an ext4-patch from 2.6.30 available in openvz-2.6.27 branch?
Why don't you try to prepare it yourself?

Because there is no openvz-2.6.30 branch.

I just asked if there is any. Not to make one for me.
