Hello ,

I've network problem on the Vpses !

after restart one of vpses i see this error message :

```
[root@roza ~]# vzctl restart 140
```

```
Restarting container
```

```
Stopping container ...
```

```
Message from syslogd@ at Sat Aug 15 18:59:26 2009 ...
```

```
localhost kernel: unregister_netdevice: waiting for lo=ffff810195c7f800 to become free. Usage  
count = 4 ve=140
```

```
Message from syslogd@ at Sat Aug 15 19:00:06 2009 ...
```

```
localhost last message repeated 3 times
```

```
Message from syslogd@ at Sat Aug 15 19:00:07 2009 ...
```

```
localhost kernel: unregister_netdevice: device ffff810195c7f800 marked to leak
```

```
Message from syslogd@ at Sat Aug 15 19:00:07 2009 ...
```

```
localhost kernel: free_netdev: device lo=ffff810195c7f800 leakedContainer was stopped
```

Other Vpses network have became down every 5 min

So I see many error messages in var/log/messages :

```

Aug 15 23:52:29 localhost kernel: Advised path = 217.23.1.224 -> 94.101.190.12

after see this problem ! i've changed the kernel to latest " 2.6.18-128.2.1.el5.028stab064.4 " and restarted server . " localhost kernel: unregister_netdevice " Problem solved but the Network downtime problem will be remain ... !

where is the problem ? please help me

Thanks

Hello ,

I'd solved the problem

Thanks

Hi,

I have the same problem, how you solve ?
