Subject: Difference between veth and venet
Posted by dgarstang on Wed, 23 Sep 2009 17:25:24 GMT

Can someone please explain to me the differences between the OpenVZ veth and venet network devices? I've read over the wiki docs at:

http://wiki.openvz.org/Veth
http://wiki.openvz.org/Venet

numerous times and they seem to be written pretty badly and just don't make sense, no matter how many times you read them. I'd really like to understand the differences, and which one I should use in particular situations.

Thanks,
Doug.
