Hi there,

i have to migrate a physical (debian etch) to a virtual server. Are there any tools available (similar to VMWare Converter) or do i have to setup a virtual server and can just migrate the data?

Thanks in advance for any good news.

Hi,

rsync, see http://wiki.openvz.org/Physical_to_container

Bye,
 Thorsten

Thank you! A shame i did not find it by myself in the wiki.

Cheers!
