hello

i need your help please

i have problem with cpanel and ssh

every time it shows this error :
fork: Cannot allocate memory

i know its need big memory but i had 8 GB and used not even 3 GB

so i see this error every hour and stopping the ssh and cpanel but the sites working %100

so how i fix it ?!

Hi,

please check the user_beancounter of your container and increase privvmpages

Bye,
Thorsten

how would be 8 GB

i don't know the right number for 8 gb coz there is much number is don't know this kb or mg or gb or what .

or i want to make every thing unlimited and remove limited
