```
/dev/sdc1 on /mnt/sde type ext3 (rw,noatime)
/mnt/sde/vz on /vz type none (rw,bind)
```

```
// Find out the default config file
# grep CONFIGFILE /etc/vz/vz.conf
CONFIGFILE=lalala
// In case you specify --config on 'vzctl create', check that one instead

// Find out the disk space limits in the default config
# grep DISK /etc/vz/conf/*lalala*

// Below we assume VEID=200

// Find out the disk space limits in VE config
# grep DISK /etc/vz/conf/200.conf

// Check current quota limits and usage
# cat /proc/vz/vzquota | sed -n '1p; /^200:/,+2p'

// Check real disk usage
# du -sh /vz/private/200
```
