Hi

I want Install elastix, is centos 5, I created the template but How can I boot from cd? or somebody installed elastix successfully?
because many modules is broken

Best Regards

Hello,

Quote:
I created the template

Great, now you can create a CT based on that template.

or somebody installed elastix successfully?

Do you want to install Elastix via CD? I guess that you may do it in the same way as installing another distributions.

Thanks

How can I install Elastix via CD like a container?

Best Regards

Dear Augusto,

you'd better ask Elastix support how to install Elastix.
