Hi all,

i have a problem with vzdump and suspend.

```
cat /proc/version
```

```
Linux version 2.6.26-1-openvz-686 (Debian 2.6.26-13lenny2) (dannf@debian.org) (gcc version 4.1.3 20080704 (prerelease) (Debian 4.1.2-25)) #1 SMP Fri Mar 13 20:20:40 UTC 2009
```

```
vzctl --version
```

```
vzctl version 3.0.22
```

my problem is that only one vz can't go into suspend:

```
vzdump --compress --dumpdir /mnt/backup/OPENVZ/host/ --tmpdir /var/vztmp/ --suspend -all
```

```
205: Nov 09 04:11:21 INFO: Setting up checkpoint...
```

```
205: Nov 09 04:11:21 INFO: suspend...
```

```
205: Nov 09 04:11:21 INFO: Can not suspend VE: Device or resource busy
```

```
205: Nov 09 04:11:21 INFO: Checkpointing failed
```

```
205: Nov 09 04:11:27 ERROR: Backup of VM 205 failed - command '/usr/sbin/vzctl chkpnt 205 --suspend' failed with exit code 16
```

The vz has no nfs connections.

Do you have any ideas?

Maybe you "stepped" on this container, i.e. there is a process in host system which is currently in CT directory. Try to suspend manually, see what's in dmesg, find out the reason.

okay i have suspended it manually

```
vzctl chkpnt 205 --dumpfile /mnt/backup/OPENVZ/dump205
```

```
Setting up checkpoint...
```

```
suspend...
```

```
Can not suspend VE: Device or resource busy
```

```
Checkpointing failed
```

the latest dmesg messages are

```
[7431996.225352] CIFS VFS: No response for cmd 114 mid 17110
```

```
[7553312.071619] CIFS VFS: No response for cmd 114 mid 22750
```

```
[7593025.584121] CIFS VFS: No response for cmd 114 mid 21595
```

```

```

```
[8077086.067091] CIFS VFS: No response for cmd 114 mid 35181
```

```
[8154909.518849] CT: 205: stopped
```

```
[8154939.950869] CT: 205: started
```

```
[8239642.105250] CIFS VFS: No response for cmd 114 mid 39780
```

```
[8304014.800603] CIFS VFS: No response for cmd 114 mid 44298
```

```
[8304015.436584] CIFS VFS: No response for cmd 114 mid 15326
```

I think thats not very helpful?

What do you mean with "stepped" this container?

what is the CT Directory?

I've executed the command

with strace and found there following file:

```
more /proc/cpt
```

```
Ctx   Id   VE   State
```

```
eaf79000 000000cd 205    2
```

Does anybody know what this mean?
