Hi, I only came here after to try to do this in a lot of ways and take a lot weeks involved.

So it´s possible to give to our communite a template with centos with everything necessary to acess ussing Windowns Terminal Service, or another viewer.

It realy appears easy but I couldn´t do it with rdesktop, NCmachine, NVCviewer...

Thanks a lot!

Carlos

Oi Carlos.

This is not strictly a VE problem, but anyway:

Install any template. Enter the VE. apt-get install kdebase (or yum install kdebase) ou gnome or whatever. Install the 3 packages of nxserver free edition for linux from www.nomachine.com.

Install nxclient, configure and connect.

Easy.
