hello,

i have a problem with a vps container

the total space for the container is 18 G.B and i gave him space 30 G.B

but it show the used space is 29 G.B not 18 G.B

so there is 11 G.B Wasted , what's wrong with that ? and how could i get that wasted space ?

thanks

this should fix it:

```
vzctl stop ID ; vzquota drop ID ; vzquota start ID
```
