mpd->ppptd +radius+FreeNibs+mysql+apache

pppd: This system lacks kernel support for PPP. This could be because the PPP kernel module could not be loaded, or because PPP was not included in the kernel configuration. If PPP was included as a

module, try ``/sbin/modprobe -v ppp'`. If that fails, check that `ppp.o` exists in `/lib/modules/`uname -r`/net`. See `README.linux` file in the `ppp` distribution for more details.
