Hi

I have in a HN a public IP.. 200.200.200.1

I set in a Container other public IP.. 200.200.200.2

The Container only access internet after I create a rule iptables for NAT.

This is normal ?

Do it must access the internet without nat ?

Thanks

Renato

Obviously iptable rules can affect the VE's ability to reach to the Internet. Moreover your ISP may reject all traffic unless it's going from 200.200.200.1.

Generally speaking you may switch iptables off then tune the VE and then switch iptables on.
