hi!

I've seen in git that vzctl has some tags vzctl-3.0.23.1 and vzctl-3.0.23.2.

But actual version in the WIKI is still vzctl-3.0.23. Is this correct?

Stefan

3.0.23.2 just adds a couple of features (which are also in vzctl-3.0.24), if you want you can compile it yourself from git. We are trying to release 3.0.24 soon.
