Hi,
I am using the 2.6.8-022stab078.10 kernel.
My user_beancounters file is 0 bytes.
How can I get it to display the values.

```
-r--r--r--  1 root   root    0 Jul 20 18:29 user_beancounters
```

I have 2 vz's running.

VPSID	NPROC	STATUS	IP_ADDR	HOSTNAME
101	17	running	192.168.85.133	test101.com
102	32	running	192.168.85.134	test102.com

Pls. help.
Thanks.
Sathish.

Just do
cat /proc/user_beancounters
/proc is a virtual filesystem, so file sizes can be equal zero,
but there is something in this files. It's usual.
