Setting up checkpoint...
    suspend...
    dump...
Can not dump container: Invalid argument
Error: d_path is invisible /dev
Error: scheduler policy is not supported 7863/6839(murmur.x86)
Checkpointing failed

What does it mean? Google answer is No results found for "scheduler policy is not supported".

Hi,

I'm not absolutely certain of my facts but I think that the last message "scheduler policy is not supported" may somehow be related to the previous one "d_path is invisible". There are few bug reports with "invisible d_path" error but I wasn't able to find anything with "schedule policy". So I'd suggest you to file a new bug report. But don't forget to specify your system in detail (OS, kernel, what kind of VE, arch etc).

Invisible d_path reports in bugzilla
