Hello,

My datacenter told me :
Too many arp send ! If i don't stop to send this arp my ip will be delete..

```
tcpdump -ni eth0 arp
17:36:18.599572 arp who-has 94.23.251.242 tell 94.23.221.254
17:37:06.562505 arp who-has 94.23.251.251 tell 94.23.221.58
17:37:06.562637 arp reply 94.23.251.251 is-at 00:30:48:32:cd:d0
17:38:06.644531 arp who-has 94.23.251.251 tell 94.23.221.58
17:38:06.644683 arp reply 94.23.221.251 is-at 00:30:48:32:cd:d0
17:39:06.731018 arp who-has 94.23.251.251 tell 94.23.221.58
17:39:06.731153 arp reply 94.23.251.251 is-at 00:30:48:32:cd:d0
```

Etc .. what can i do ?

I have a second problem :

Adding IP address(es): xxx.xxx.xxx.xxx

arp send: xxx.xxx.xxx.xxx is detected on another computer : 00:xx:xx:84:04:00

But it's a new Block RIPE /28 and i don't use this ip anywhere ..

Please help me !

Regards ,
Quentin

Do you have a chance to find out who the computer 00:xx:xx:84:04:00 belongs to?

You don't use it but somebody may use it. (00:xx:xx:84:04:00?)
