
Subject: zquota : (error) Quota getstat syscall for id
Posted by [yanncarlier](#) on Mon, 12 Jul 2010 15:16:25 GMT
[View Forum Message](#) <> [Reply to Message](#)

```
[root@set ~]# uname -a
Linux set 2.6.18-194.3.1.el5.028stab069.6 #1 SMP Wed May 26 18:31:05 MSD 2010 x86_64
x86_64 x86_64 GNU/Linux
```

After I did a

```
# yum remove *.i?86
```

and restart the server I'm getting:

```
[root@set ~]# vzctl --verbose start 303
Starting container ...
vzquota : (error) Quota getstat syscall for id 303: Inappropriate ioctl for device
vzquota on failed [3]
```

```
root@set ~]# /etc/init.d/vz start
Starting OpenVZ: failed to load module vzmon [FAILED]
[root@set ~]#

I've fixed:

```
rm /etc/modprobe.d/ipv6
```

Thanks
