Hi,

I have a new project.
Ubuntu Business Desktop

Projectpage: http://sourceforge.net/projects/ubuntu-business/
Wiki: http://sourceforge.net/apps/mediawiki/ubuntu-business/index. php?title=Main_Page

It is recommend to use Proxmox for OpenVZ: http://pve.proxmox.com/wiki/Main_Page This system is bootable in about 10 Minutes.

Bugs such hight CPUlevel (DBUS) were fixed. Features such as "avahi" and "bonjour" were added. Three templates are ready for Download. Version 0.2 stable.

 - BusinessDESKTOP_0.2_i386
 - BusinessSERVER_0.2_i386
 - BusinessSERVER_0.2_amd64

Features:

   * OpenVZ Gnome for Business
   * Autoconnection to Webmincluster
   * Autoupdate for the System
   * Adminstration only on https://hostname:10000
   * Compatible with Proxmox
   * Web-based adminisration with webmin
   * Entry Neatx Terminalserver (Desktopversion)
   * Active DHCP-Client (Vlan)
   * Autoconnection to apt-cacher
   * Business userprofiles (Desktopverion)
   * Samba Integration (Desktopverion)
   * Avahi/Zeroconf/Bonjour/mdns

greetings
