Subject: VZ very slow
Posted by pppplus on Tue, 17 Aug 2010 23:11:34 GMT
View Forum Message <> Reply to Message

Hi,

From some days, I try to configure a new server, with openvz.
Not so hard, google is very helpfull.

But to finish, and optimize Container and main Server, it is a little hard, and I find some "strange" things.

OpenVz is know as consuming only few ressources. And for me, it is not the case.

Generally :
surfing on website is ok.
The rest is often, very slow, for exemple using DirecAdmin panel.

An exemple of message in Directadmin :
Your connection has timed out
Détails
Either your request was invalid or the program hasn't completed your request.
Please notify the server admin
Or just a command like
yum install <something> is very very long.

Server is 4x 2x 2.66+ GHz with RAM 12Go.
Linux ks312650.kimsufi.com 2.6.18-194.8.1.el5.028stab070.2 #1 SMP Tue Jul 6 14:55:39 MSD 2010 x86_64 x86_64 x86_64 GNU/Linux

Only one website is running on one container. Ok, there is a lot of connection, but this website took 25% of ressources of the previous server (2*2*2.33Ghz + RAM 4Go - not with openvz), so not so big.

Top of server :
top - 11:48:44 up 3 days, 20 min,  2 users,  load average: 15.75, 17.55, 22.91
Tasks: 810 total,   1 running, 802 sleeping,   0 stopped,   7 zombie
Cpu(s):  0.8%us,  0.3%sy,  0.0%ni, 83.2%id, 15.6%wa,  0.0%hi,  0.1%si,  0.0%st

```

What is strange for me :
=> high load average and only few cpu %

I prepare 3 containers.
1 is working
1 is connected but without domains or trafis

1 is not active (IP is used on another server) but start.

Top of 1 Container working :

```
top - 11:52:26 up 1 day, 20:17,  0 users,  load average: 3.52, 7.69, 13.52

Some strange dovecot - pop3-login running
Often load average, 10-20, but always very few cpu%
Often, impossible to connect via FTP connect to read emails
Navigation in DirectAdmin very slow. Almost impossible to decompress Backups.
But navigation http without problem, very quick.

Top of 1 Container connected, but without domains, trafic :

```

A lot of dovecot - pop3-imap / imap-login
Idem, very difficult to use directadmin panel. That's very slow.

Top of 1 Container started, but not working (ip not connected) :

```

```

So, problably something is misconfigured, but I don't know what.

Exemple of a conf for a container (those one working).

I use wzsplit to have idea of values.

vmstat.txt

Output from vmstat:

```
procs -----------memory---------- ---swap-- -----io---- --system-- -----cpu------
  r  b   swpd   free   buff  cache   si   so    bi    bo   in   cs us sy id wa st
```

```
2  1     0 6652480     0     0    0    0     0    12    0    7  2  0 92  6  0
```

Sorry for this long post, but I don't know where I can find indication to have normal performance.

Thanks to have read, and I hope you can help me.

Best regards

Hi,

plz show the ubc (=userbeancounters) of ct,

like

$ cat /proc/user_beancounters
or
$ cat /proc/bc/<CTID>/resources

any fail logged ?

Bye,
Thorsten

Hi, and thanks for your reply.

I have no more user_beancounters.
I delete all VPS, and come back to a "normal" web hosting.

Just one thing, I have only few kmemory failcnt at the beginning. After some modifications, it was ok.

Just system was always very slow.
It was exactly the same, with openvz or proxmox, but the 2 systems are almost the same.

Maybe because I use 64bits system, I don't know. I only try with centos 5 64 bits, because I have

only licence for this panel for directadmin.

I will try later, with another server, so if you have some explanations...

Best regards
