Subject: Mount Remote Drive
Posted by dlewis23 on Thu, 26 Aug 2010 23:10:09 GMT

Hello,

I do not run a OpenVZ node but I figure this might be the best place for me to get some help.

I have one storage server and 2 VPS servers that are run with OpenVZ.

I need to mount the drive from the storage server on the 2 VPS servers but I can't figure out a way to because my host spacerich.com will not allow NFS or fuse for SSHFS.

Does anyone else know of anyway that could maybe mount the drive on the 2 VPS servers?

Thanks.
