I'd like to see some sort of TOP utility that would show the VEs and how muck of a load each one is using. Is there such a thing?

if it is just the load u're interested in

file: vpsload.sh

```
#!/bin/bash
```

```
for i in $(vzlist -H |awk '{print $1}'); do echo "VZID: $i" ; vzctl exec $i cat /proc/loadavg;done
```

```
$: watch ./vpsload.sh
```
