
Subject: IPs constantly disconnecting

Hello,

for some months I have been using OpenVZ with several IPs. I am using cPanel with this VM. there was nothing wrong until about a month ago; my IPs started disconnecting at regular intervals.

It seemed that maybe the ARP entries kept disappearing, I would have to add the IPs to the host node and ping them each time to get them working again, then add them to the VM again.

Are there any known issues similar to this?

Hope someone can help! Thanks!
