Subject: how do i setup custom partitions
Posted by junker10 on Thu, 30 Sep 2010 08:14:09 GMT

i need to setup custom partitions
swap 12G   --main partition
100M /boot -- main partition
15G /   -- main partition
5G /file   -- first logic partition

how do i do it

and if i can on my vps or node

i m use openvz and Hypervm

how can i setup a 12G swap on my VPS and if i can get help

custom hard disk partitioning of dedicated servers (hardware node) should be done by you
dedicated server provider. although you can use fdisk to partition free disk space, it is a
professional task and should be done with care.
