hello

i have problem with 3 vps servers of 10 server suddenly stop working and not pinging, but the others vps on the same block of the ips working without any problem, all the problem with 3 vps only and all with the same issue not different

when i enter at any of the server have this problem and saw the top command i got

```

```

when i execute ifconfig command i got NOTHING TO SHOW and i check the ifcfg-venet0:0 files and saw the ips set well

i took those ip from 1 vps have this problem and create another NEW vps still have this issue and the ips not pinging

what i missing here ?

thanks

hi,
try to use another ip.
and then put the route table here:
which command :route -n
