We didn't change anything in system configuration:

```
# uname -a
Linux ficux 2.6.26-2-openvz-686 #1 SMP Wed Nov 4 22:06:32 UTC 2009 i686 GNU/Linux
```

Please, can you tell what do you thought is happening?

Thank's in advance.

and attach some info ...

btw, your kernel version or your system should be upgraded!

Thank you very much.

I try to upgrade kernel and wait for the results. If this doesn't solve the problem, what kind of info I must attach?

Kind's.
