[View Forum Message](#) <> [Reply to Message](#)

```
~$ vzdump 2
ERROR: got reserved VM ID '2'
~$ vzdump --suspend 2
ERROR: got reserved VM ID '2'
~$ vzdump --snapshot 2
ERROR: got reserved VM ID '2'
~$ vzdump --dumpdir /vz/dump --snapshot 2
ERROR: got reserved VM ID '2'
~$ vzdump --snapshot control
ERROR: strange VM ID 'control'
```

Are there some restrictions for VEID numbers?
vzdump man page doesn't say anything about it.
Where is documented this question?

Hi,

The first Container id should be 100 or higher than 100.

Bye,
Thorsten

Subject: VEID >= 100

Where is documented VEID numbers restriction?
It's a design feature, or a bug only in vzdump script?

Hi,

have you read the OpenVZ User Guide, pp 32. Sec. "Choosing Virtual Private Server ID" ...

Bye,
Thorsten

Ok, I've now found the guide.

Thanks.
