Tried pptp-client to establish VPN from inside a VPE. Got
anon warn[pptp_gre_bind:pptp_gre.c:82]: socket: Address family not supported byl
anon fatal[main:pptp.c:275]: Cannot bind GRE socket, aborting.

My configuration is veth, I didn't test venet with it yet.

Are there any plans to implement GRE through veth/venet?

Ildar.

I've the same problem.

Any ideas or any solution for it?
