Hi:

when I execute this command as below, it turn out to be error

```
iptables -t nat -A POSTROUTING -o venet0 -j MASQUERADE
iptables: Unknown error 4294967295
```

i want to install OpenVPN, but face many many difficute.

have no vz file under this derictory:

```
[root@addison /]# cd etc/sysconfig/
```

```
[root@addison sysconfig]# ls
```

```
authconfig  crond  iptables-config  modules  networking  readonly-root  sendmail
syslog
```

```
cbq  i18n  lm_sensors  netconsole  network-scripts  rhn  snmpd.options
```

```
udev-stw
```

```
console  init  mkinitrd  network  rawdevices  saslauthd  snmptrapd.options  xinetd
```

Anyone can give me some suggestions?

Thanks!

have you follow this instructions ?

```
wiki.openvz.org/Setting_up_an_iptables_firewall#Setting_up_a
_firewall_that_allows_per-container_configuration
```

load module on HN, edit your vz.conf file ?
