From: Jacob Pan <jacob.jun.pan@linux.intel.com>

Fixing subject in cover letter, should be v4 instead of v3

Changelog:

v6: - remove check for duty ratio == 100 case

v5: - improve error handling in duty ratio/ period writes

- fix the logic to avoid kthread creation when ratio and period are invalid.

- 100% frozen is not permitted in duty ratio set up

v4: - limit kthread creation only when valid duty ratio parameters are given.

- changed period back to milisecond

- consolidated paramter write functions

v3: - added documentation

v2:

- use read_u64/write_u64 instead of string read/write

- use period in second instead of ms

- renamed duty_ratio to duty_ratio_pct, be more specific

- removed locking around period and duty_ratio reads
