Subject: Failed to create VPS?
Posted by FaithInUnseenThings on Thu, 10 Mar 2011 22:22:38 GMT

Internal error: Command 'vzctl create 1 --ostemplate centos-5-x86_64 --config light' execution failed with code 48
Output: Creating container private area (centos-5-x86_64)
Warning: Temp dir /vz/private/1.tmp already exists, deleting
tar: ./usr/bin/semodule_package: Cannot write: Disk quota exceeded
tar: Skipping to next header
tar: ./usr/bin/watch: Cannot write: Disk quota exceeded
tar: Skipping to next header
tar: Archive contains obsolescent base-64 headers
tar: Error exit delayed from previous errors
vps-create ERROR: Error in tar --numeric-owner -Sp -z -xf
/vz/template/cache/centos-5-x86_64.tar.gz
Creation of container private area failed

Strange, because there is nearly 600GB free on this drive, its a brand new box.

That's some quota limit? You can check quota limits with:
repquota -a

Regards,
