Internal error: Command 'vzctl create 1 --ostemplate centos-5-x86\_64 --config light' execution failed with code 48

Output: Creating container private area (centos-5-x86\_64)

Warning: Temp dir /vz/private/1.tmp already exists, deleting

tar: ./usr/bin/semodule\_package: Cannot write: Disk quota exceeded

tar: Skipping to next header

tar: ./usr/bin/watch: Cannot write: Disk quota exceeded

tar: Skipping to next header

tar: Archive contains obsolescent base-64 headers

tar: Error exit delayed from previous errors

vps-create ERROR: Error in tar --numeric-owner -Sp -z -xf

/vz/template/cache/centos-5-x86\_64.tar.gz

Creation of container private area failed

Strange, because there is nearly 600GB free on this drive, its a brand new box.

Cannot write: <b>Disk quota exceeded</b>

Strange, because there is nearly 600GB free on this drive, its a brand new box.

That's some quota limit? You can check quota limits with:

# repquota -a

Regards,
