Subject: SOLVED --->. tar.gz.tar.gz not found while trying to create a container
Posted by lemmingNO1 on Wed, 30 Mar 2011 20:49:48 GMT

Oops! Problem solved.

Someone just pointed out that I was directly linux copying the .tar.gz
with the name of the template. The amazing thing is, I knew not to do
that when I did it....and then my mind seemed to hide what I was seeing
as I stared at this thing.

Sorry about the wasted send. Wouldn't you know I would get the answer
right after I hit the send button!
