Hallo,

I've just upgraded to latest Kernel 2.6.18-238.5.1.el5.028stab085.3xen. Now the time in the VNs runs away:

```
vn1:/# date
Fri Apr  8 23:03:15 CEST 2011
vn1:/# date
Sat Apr  9 01:09:18 CEST 2011
vn1:/# date
Sat Apr  9 01:54:03 CEST 2011
(I've entered the date command every 2 seconds)
```

On the hardware node the clock runs at normal speed.

When using the older kernel 2.6.18-194.26.1.el5.028stab081.1xen the clock on both HN and VN runs correct.

(HN: Centos 5, VN: Debian)

Is this a known error or am I doing something wrong ?

Greets  
MrDigi
