Hi all,

just installed a Debian Squeeze Container while using the latest RHEL 5 stable Kernel.

I'm now getting a lot of messages like these:

```
/etc/cron.daily/logrotate:
```

```
syslog-ng: Error setting capabilities, capability management disabled; error='Operation not permitted'
```

Any idea?

Greets
Stefan

any strace output from

```
"invoke-rc.d rsyslog reload"
```

btw vzctl version ?

Bye,
Thorsten

```
# vzctl --version
```

```
vzctl version 3.0.26.3
```

strace attached

Thanks!
