Greetings,

Kir sent out an announcement today about vzkernl-2.6.32-042stab013.1.

<http://wiki.openvz.org/Download/kernel/rhel6/042stab013.1>

Note the "stab" in the name. I assume that means that the RHEL6-based 2.6.32 branch is now considered stable and has been moved out of devel. If that is true, this pages needs to be updated:

<http://wiki.openvz.org/Download/kernel>

Congratulations on this milestone!

TYL,
