

Bonjour

J'ai une VM Openvz qui contient une base mysql. J'ai à chaque démarrage de mysql le message suivant :

```
ERROR 2002 (HY000): Can't connect to local MySQL server through socket
'/var/run/mysqld/mysqld.sock' (2)
ERROR 2002 (HY000): Can't connect to local MySQL server through socket
'/var/run/mysqld/mysqld.sock' (2)
ERROR 2002 (HY000): Can't connect to local MySQL server through socket
'/var/run/mysqld/mysqld.sock' (2)
ERROR 2002 (HY000): Can't connect to local MySQL server through socket
'/var/run/mysqld/mysqld.sock' (2)
ERROR 2002 (HY000): Can't connect to local MySQL server through socket
'/var/run/mysqld/mysqld.sock' (2)
```

J'ai aussi régulièrement ce message d'erreur : #2006 - MySQL server has gone away.

Autant dire que ma VM ne fait pas du tout son travail.

J'ai tenté de modifier les limits de ma vm mais rien n'y fait. Je suis méchamment bloqué sur le coup.

Je vous poste la config trèèèè modifiée de ma vm.

"Chez Moi ça Marche".

Bon je sais que ca n'apporte pas grand chose alors je te colle ma conf et le contenu de /proc/user_beancounters.

PS c'est un ancien serveur physique converti en conteneur. le seul problème que j'ai est au redémarrage du noeud il perds soit son ip, soit la route par défaut...

```
cat /etc/vz/conf/CTID.conf

```

la suite est pas tres lisible mais un copié collé dans un fichier a un meilleur rendu.

```
cat /proc/user_beancounters
```
