Subject: Question regarding XFS vs ext3/4
Posted by Timh B on Mon, 20 Jun 2011 09:20:34 GMT

Hi,

Could someone outline shortly why there's no support for XFS in vzquota/tools and what needs to be done to support it? I have a couple of clusters running XFS for various reasons and would like to get quota/usage reporting to work both in the host and guests.

Cheers!
