Hi

I just published an howto about setting up OpenVZ on a clean Debian installation; I also explain why I chose OpenVZ.

I can't post a link here for now but you can find the post at blog.hashtagify.me

If you have any comments or suggestions you're welcome!

Dan

In Debian 6, I just perform the following commands:

Case for 32-bits system

```
apt-get update
apt-get install linux-image-openvz-686
ln -s /var/lib/vz/ /vz
reboot
```

Case for 64-bits system

```
apt-get update
apt-get install linux-image-openvz-amd64
ln -s /var/lib/vz/ /vz
reboot
```
