Hi!

I try to download suse template and after creating server can't start, my vz.log is clear, last actions are:

2011-08-23T04:54:14+0400 vzctl : CT 34120 : Container start in progress...
2011-08-23T04:54:17+0400 vzctl : CT 34120 : Container is unmounted

It's possible to start suse container under debian host?

Anyone try to setup suse template container on Debian host?

My kernel: Linux ovz00 2.6.32-5-openvz-amd64

I recently trying setup suse 11.3 and 11.4 but with no success

I'm having the same problem, the container starts and then shuts down immediately.

Kernel is 2.6.32 and the template is suse-11.4-x86.tar.gz

No error messages appear at all.
